DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Arzbaecher U.S. Pat. No. 5,607,418.

Arzbaecher discloses an infusion device comprising: a variable volume storage chamber (21) for holding the fluid, said storage chamber (21) including means (18) for allowing fluid to be added to the storage chamber, a pressurizing means for the storage chamber (20), said pressurizing means maintaining the pressure within the storage chamber (21) above a preselected outflow pressure, an outflow chamber (26) for receiving fluid from the storage chamber (21), said outflow chamber including means (fig. 1) for attachment thereto a flow restrictor means (35) and catheter through which fluid in the outflow chamber is delivered to a patient, and a regulator pressure means (30) located between the storage chamber (21) and the outflow chamber (26) said pressure regulator means functioning to maintain the pressure in the outflow chamber at the preselected outflow pressure, said pressure regulator means allowing fluid to be transferred from the storage chamber to the outflow chamber so that there is a continuous and controlled volume of flow from the outflow chamber through the flow restrictor means and catheter to the patient (30); as to claims 2-9, (see above rejection and figs. 1 and 2).

Response to Arguments

Applicant's arguments filed 3/25/03 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., continuous delivery of drugs) are clearly shown in Arzbaecher. Simply, Arzbaecher device is a continuous flow delivery pump as long as there is fluid in the storage chamber (col. 5, lines 55-65). Once the storage chamber is empty the device will no longer continue to delivery fluid. Similarly, applicant device is a continuous flow delivery pump as long as there is fluid in the storage chamber as indicated on (page 6, last paragraph) of applicant's arguments.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
